Hello Jeannine,

A more complete client list:

Meritor, Lenovo, New Era, Pitney Bowes, CEVA, Mueller Sports Medicine, HUSCO, Wabtec, Ball Corp, Pacific Cycle, PGW and LQK.

I will add the request.

Regards, Dan

Subject: Can we add two data records to Inflight TP Relationships report?

Hi Jeannine,

I tried using suggest an improvement but I could not locate SCBN Premium in the product matrix.

I have a report enhancement to request. HUSCO, Wabtec, Ball Corp and Pacific Cycle have all mentioned this to me in recent weeks.

- **Background:**
Clients request custom reports from us at times to pull an inventory of trading partners, envelope names and map names.
It requires a case to be opened and L3 must run this. It takes many days to get the report.
- **Request:**
Please consider adding "Envelope Name" and "Map Name" to the 'Trading Relationships' activity report's 'Column options'.
- **Benefits:**
Clients can pull data on-demand

We reduce, possibly eliminate the involvement of L1, L2, L3 support in running these reports.

Please see below.

There is an inflight activity report called 'Trading Relationships'

The screenshot shows the IBM InFlight interface for the 'Trading Relationships' report. The top navigation bar includes the IBM InFlight logo, a search bar with 'Any' entered, and a user greeting 'Welcome, Dan!'. The main header shows 'Trading relationships' and 'Company: HUSCO International, Inc.'. On the left, there are filter sections for 'Client', 'Trading partner', 'Document type', and 'Direction', each with a dropdown menu set to 'Any'. The main area displays a table with columns: Client, Client name, Trading partner, Trading p..., Document type, Direction, Connection type, and Last activity. The table is filtered to show 1-10 of 26 records. A 'Column options' dialog box is open in the center, listing the following columns with checkboxes: Client (checked), Client name (checked), Trading partner (checked), Trading partner name (checked), Document type (checked), Direction (checked), Connection type (checked), and Last activity (checked). At the bottom of the dialog, there are 'Select all' and 'Apply' buttons.

Add 'Envelope Name' and 'Map Name' to column options.

IBM InFlight Search for doc direction Any Welcome, Dan! Company: HUSCO International, Inc.
